- Platform Security

Project Requirement

Platform:

h

, Web-based Admin Panel

Technology

- Database: h
- API Framework: h
- Backend: h
- App: h

Features

- **Onboarding/Welcome Screens:** Introduction to the app's purpose, features, and benefits. Key messages about quality, reliability, and ease of use.
- **Sign-Up/Login Page:** User authentication with options for email, phone number, or social media.
- **Home Page/Dashboard:** Featured products (fertilizers, supplements, etc.). Seasonal recommendations and trending items.
- **Product Catalog Page:** Categories such as fertilizers, soil conditioners, organic supplements, and pest control. Filters for type, crop suitability, price, and brand.
- **Product Details Page:** Comprehensive product information, including benefits, application instructions, and ingredients. Images, videos, and ratings/reviews.
- **Crop Recommendations Page:** Interactive feature where users select their crop type and receive tailored product suggestions.
- **Subscription Management Page:** Option to subscribe for regular deliveries (e.g., monthly fertilizer supplies).
- **Cart Page:** Manage selected products, view estimated costs, and apply discounts.

Project Requirements Details

1. Overview

This document outlines the requirements for a mobile application called "TaskMaster," designed to help users manage personal tasks efficiently. The target audience is individuals aged 18-45 who utilize smartphones for productivity. The app should be intuitive, reliable, and performant.

2. Core Features

- **Task Creation:** Users can create tasks with titles, descriptions, due dates, and priority levels.

- **Task Management:** Users can edit, complete, and delete tasks. Sorting and filtering options should be provided.

- **Reminders:** Users can set reminders for individual tasks.

- **Progress Tracking:** The app should visually display task completion progress (e.g., using a progress bar).

- **Cloud Synchronization:** Data should be synchronized across multiple devices using a cloud-based backend.

3. Technical Specifications

- **Platforms:** iOS and Android

- **Development:** Native (Swift/Kotlin preferred)

- **Offline Functionality:** Basic task creation and editing should be available offline.

- **API Integration:** Secure API for data synchronization and authentication.

4. User Flow

The app should follow a straightforward user flow. Upon launching, users are presented with their task list. Creating a new task should involve minimal steps. Navigation between different sections (e.g., task list, settings) should be intuitive and easily accessible.

5. Security Requirements

- **Authentication:** Secure user authentication (e.g., OAuth 2.0).

- **Data Encryption:** Data at rest and in transit should be encrypted.

- **Secure API:** API endpoints should be protected against common vulnerabilities.

Budget & Timeline

Item	Details
Budget	h
